

Pre-Surgery Worries?

Children are typically less scared when they know what to expect.
Please join us at Wentworth-Douglass Hospital to explore Same Day Surgery.

Pre-operative tours help children over three and teens become comfortable with what they will see, hear and feel on surgery day.

Children and their families will:

- Visit a pre-op room, operating room, and recovery room to familiarize self with equipment.
- Meet an anesthesiologist or nurse anesthetist to ask questions about procedure.
- Talk with a Certified Child Life Specialist, who is trained to help children understand and cope with medical experiences.

To schedule a free tour, contact our Child Life Program at 603-740-2496
